MANHOLE ACCESSORIES

For Water Inflow Prevention

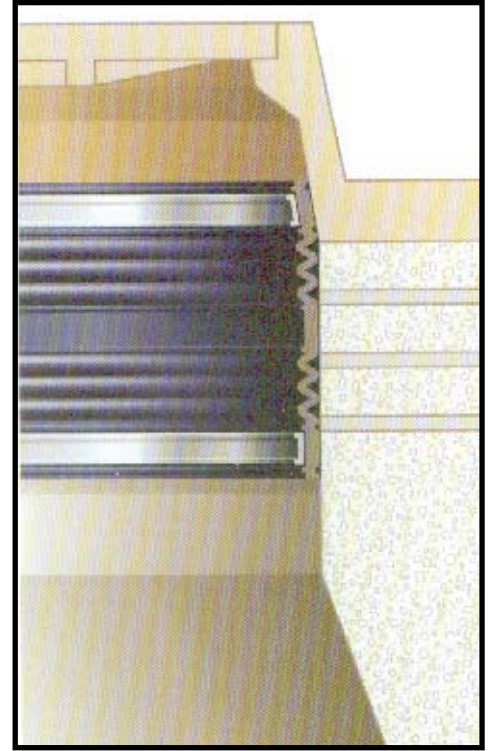

NPC Internal FlexRib Seal

Frame to Concrete Seal Option

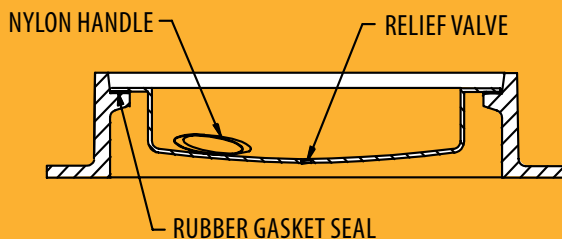

- Eliminates wet weather inflow by creating a watertight seal between casting and cone
- Easily installed in new or existing manholes
- Allows for vertical or lateral movement
- Various sizes and extensions available
- Installation is available upon request

The grade adjustment area has proven to be the single largest source of inflow, but is the least expensive to rehabilitate.

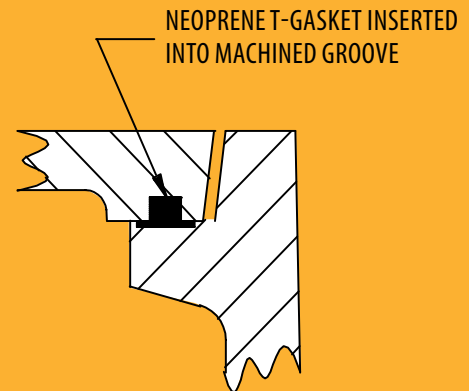

For Surface Water Inflow Prevention

“Rainstopper” Manhole Insert

- Made from durable HDPE plastic or stainless steel
- Sewer gas vented with a non-mechanical device
- Easily installed by one person in new or existing systems

Self-Sealed Manhole Covers

- Weight of cover “seals” gasket to frame
